

## **Digitalisation in university continuing education: Technology, content and pedagogy**

### **Learning Café**

#### **Strand 2 | Learning environment, digital tools and assessment**

During this learning café, two different projects about the introduction of e-assessment at the institution level will be proposed: at the Norwegian University of Science and Technology, the main focus is about increased educational quality by changing into digital assessment and how to ensure quality by a comprehensive digital workflow. Both experiences will be presented and discussed: the setup of the projects, the stakeholders to involve, the challenges and issues to address, the integration within the existing context, the current status and the future developments.

The speakers will then submit a few related questions to brainstorm with the audience and the feedback will be shared and published as a mind map.

This learning café expects an active involvement of the participants, but does not require any specific knowledge about e-assessment.
